INSULATED SOLAR GARDEN COTTAGE

8' x 16'

Field office located in front of Sutherlands Lumber
2811 S. Rangeline Rd. in Joplin, Missouri - **417-626-9663** (417-man-wood)

South Facing Windows

Designed to passively collect the warm winter rays of the sun adding free heat to your insulated Solar Garden Cottage. As the summer progresses these same south facing windows will be predominantly shaded, helping to keep building cooler, as the sun gets higher in the sky.

Double Insulated Windows and Door Glass

There is no reflective film, so you receive as much light as possible, making an excellent winter greenhouse that will need little to no additional heat depending on what you are growing and how much thermal mass you add, such as clay pots of dirt or barrels of water. We include screens for those Summer Kitchen Gardeners, Pool Side Sun Bather, Backyard Writers, Naturalists, Hunters, Fishermen & Crafters who will be comfortably “hanging out” in their Insulated Solar Garden Cottage.

Insulated Floor Walls & Roof

Sealed and insulated with glued on both sides, 3 1/2” polystyrene foam insulation, approaching a SIP (Structural Insulated Panel) in strength and insulation. No southern eave other than seamless guttering allows more sunlight into your spring and fall Insulated Solar Garden Cottage. The gutters will fill two 50 gallon water storage containers with just a little over an inch of rain (1 container included at this time for no additional cost).

Delivery and set-up included

For 100 miles its free delivery and only \$1 a loaded mile thereafter to anywhere in America.

That's right, just a buck a mile right now, after 100 miles from Joplin MO.

We build anywhere on site, in remote and hard-to-get-to locations for no additional cost at this time.

Custom fit your style, from rustic cabins to urban cottages & more.

- Solar Electrical Systems
- Plumbing (12 volt on demand water pumps, rain water cisterns, rain water barrels etc.)
- Solar hot water systems, sinks, showers, toilets
- Ozark hardwood cabinets,
- Heating and cooling systems, wood stoves, fireplaces
- Floor coverings of tile, hardwood, bamboo, water resistant vinyl
- Wall coverings from drywall to paneling and more
- Barn roof designs with lofts, flat roofs, metal roofing as well as siding.
- Bermed in the ground buildings.
- We do a range of landscaping from perm-a-culture design, annual garden design, orchard plantings, wildlife food plots, fish pools, cellars and more.

We love to make these Insulated Solar Garden Sheds self-contained and sustainable concerning food, water, electrical, heat/cool & sewage.
